

# TROMONT PRODUCTION

Perfection in metal working

TROMONT

# About us

---

Tromont Inc. is a privately owned company founded in 1995 in Split, Croatia. Our core business is developing, designing and manufacturing sheet metal parts and assemblies, metal components, ventilation ducts and equipment, as well as designing and manufacturing all kinds of low voltage electrical cabinets. We also produce customised metal constructions and welded assemblies. We are a market leader and offer a combination of a modern technology and years of experience.

**Our vision** is to build our reputation through continuous education and the application of new technologies and best business practices.

**Our mission** is to provide superior products to our partners that help them gain competitive advantage in their markets. We aim to exceed our customers' expectations in quality, delivery and cost-effectiveness.

Tromont is certified by international certification bodies: DNV and TÜV.

Our future plans are based on a clear vision and good partnerships. The commitment of our highly qualified and ambitious team to high performance, flexibility, on-time delivery, allows us to deliver the most demanding projects successfully and look to further development of the business. Expanding internationally and developing partnerships with big industrial manufacturers is at the heart of our strategy.

 **TROMONT**

# Introduction

---

“social responsibility,  
and good working and  
professional conditions  
for all its employees”

Tromont is committed to social responsibility and good working and professional conditions for all its employees. Tromont has sponsored charitable causes. The company takes its role in the local community seriously and has supported humanitarian and social projects.

These values underpin the relations between employees within the firm and our relationships with our business partners.

# Custom made constructions

## Marine program

Croatia's long experience in shipbuilding has provided Tromont with orders to make all kinds of enclosures for navigation command consoles, engine-room consoles and other maritime and naval outfitings. In cooperation with other leading companies from the marine sector we have created products of supreme design and quality.

### MARINE OUTFIT:

- Ventilation grills
- HVAC equipment
- Kitchen hoods
- Air ducts, stainless steel and aluminum
- Other outfitting equipment

## Industrial program

- enclosures for command consoles for industrial plants
- platforms and enclosures for generators
- automation cabinets

Our product portfolio includes manufacture of parts and assemblies that are integrated in industrial plants and automated production processes. High standards and in-time delivery make us perfect supplier for industrial manufacturers and process solution providers.

## Marine program

---

Within Tromont's production facility there is electrical workshop where we fit all electronic equipment for the enclosures.

- harness fitting
- interfaces and monitors fitting
- electrical components fitting
- testing

As a supplier in shipbuilding industry we provide different solutions, from our own products to custom made upon customers demand.

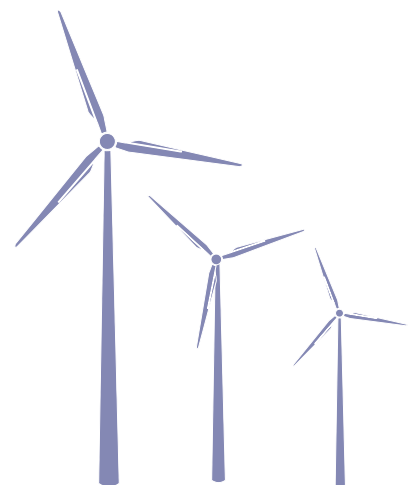

Our professional and flexible team will meet all your demands to a high standard, all in-house.

Our standardised processes and quality control result in top quality products regardless of the complexity of the work. We will always have a solution for you.

## Renewable energy exploitation plants

---

- constructions for solar power plants (fixed and modular)
- internal instalations for wind turbine pillars of all dimensions

We have broadened our production portfolio to take advantage of the growing opportunities in green energy. In our production facility we can now produce and install the internal elements and equipment for wind turbines pillars.

# Metal constructions

## The competence of our project team

Our experienced design department is competent to closely cooperate with the client and give advice in drawings and engineering.

## Our projects

- Constructions for civil engineering (decorative and structural)
- Constructions for highway signalization
- Industrial constructions and steel halls
- Fire escape ladders
- Aluminum and steel (mild and stainless steel)

EN ISO 3834-3

...perfection in metal working for the most demanding objects and projects...

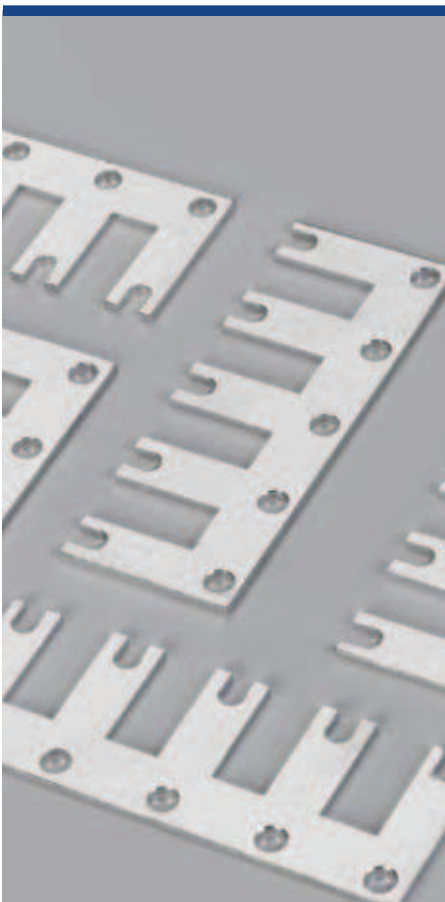

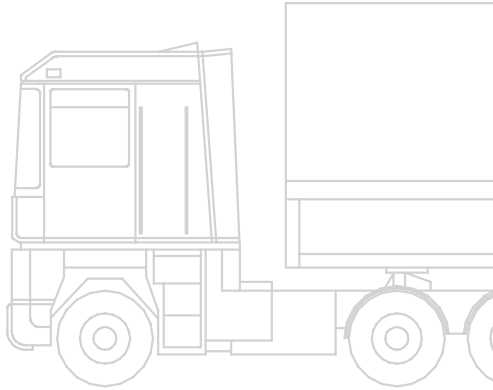

Tromont's metal workshop provides perfection in metalworking for the most demanding objects and projects. The satisfaction of our partners is our guideline, exceeding of our clients expectation is our motive, therefore we put all our effort to complete a project with high quality within it's time frame.

# Sheet metal products

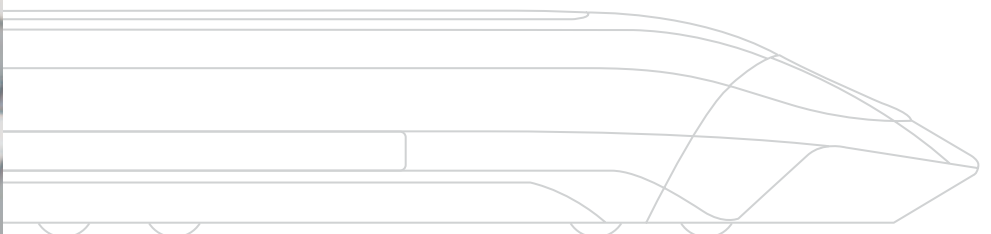

All kinds of metal parts, components and sheet metal assemblies

- CNC punching and laser cutting
- CNC forming
- CNC Hydraulic press
- CNC Shears
- MIG/MAG-WIG Welding
- Automatic powder coating plant

The combination of our team's experience and state-of-the-art equipment ensures high quality and fine precision. From the first unit to the whole series we optimize production processes in cooperation with our customers, resulting in high quality, cost-efficient products for a demanding market. Serial products, small in dimension but technically very demanding are particularly attuned to our precise and fine finishing.

As approved supplier for Bombardier Transportation Tromont is holder of EN ISO 15085-2 welding certificate for rail vehicles.

# Metal enclosures

- Enclosures for wall, freestanding and modular electrical cabinets
- Hydrant cabinets and fire extinguisher boxes
- Gas cabinets and water gauge cabinets
- Floor installation box
- Communication cabinets – networking and IT enclosures
- Heating substation cabinets

The experience generated from our core business, installations in civil engineering, and work in the field on numerous projects is incorporated into our switchboard production. Close cooperation with people in the field allows us to control our switchboards in multiple dimensions, not just as a producer, but as a user.

We not only produce, we also install so, apart from standard quality control, we have feedback from the field, which is crucial to understand our customers' needs. Our experience is at your service.

# Switchboards

- All kinds of low voltage switchboards
- We provide serial and custom made switchboards
- Electrical components provided by all suppliers according to customers demand
- Low—voltage switchgear and controlgear assemblies
- HVAC automation

Long experience in plumbing and electrical and gas installations has helped us optimise our products for end-users.

# Ventilation ducts and elements

Round and tangular ventilation ducts made of stainless steel and mild steel

- Ducts with PDF flange
- Circular and rectangular ducts on two fully automated lines custom made pieces
- Professional range-hoods
- Powder coating of all elements in various RAL
- Respect of European standards EUROVENT 2,2 (DIN 24191)

# References and machine park

## Production facility

The plant is placed in entrepreneurial zone, which is situated next to toll station Bisko on the Zagreb-Split motorway.

The plant is equipped with state of the art machines.

- CNC forming
- CNC Hydraulic press
- Plasma Cutting
- CNC Shears
- CNC line for rectangular vent. ducts
- MIG / MAG-VVIG welding
- CNC machine for round ventilation ducts
- Automatic powder coating line

ISO standards are a solid guarantee to customers that the services and products they are purchasing from the ISO Certificate bearer are of EU-approved quality. Tromont is a serious and reliable partner, committed to optimising system management to continually improve organisational efficiency and the quality and reliability of delivered services.

- ISO 9001:2008
- EN ISO 3834-3
- EN ISO 15085-2
